Basic Keybidings for ArcoLinux based Autoricer

Salil

Updated on: January 8, 2021

The keybindings mentioned in this document are not complete. Only the most useful keybindings are mentioned. For a complete or advanced set of keybindings please refer to individual software configs in ∼\.`config`

Simple Hot Keys

- `Alt` + `Enter` : Pull up a terminal (suckless terminal)

- `Alt` + `q` : Close the current window

- `Alt` + `Shift` + `r` : Restart bspwm

- `Alt` + `Shift` + `Backspace` : Power off/Reboot/Log out

- `Alt` + `d` : Application launcher (Rofi)

- `Alt` + `n` : Ranger file manager

- `Alt` + `Shift` + `n` : Nautilus file manager

- `Alt` + `b` : Brave browser

- `Alt` + `m` : Spotify

- `Alt` + `y` : System Monitor (bottom)

- `Alt` + `c` : Calculator

- `Alt` + `Shift` + `s` : Change display with multi-monitor(display) setup

- `Alt` + `Shift` + `g` : Gnome control center menu

- `Prt Sc` : Print screen (Gnome Screenshot)

- `Alt` + `Shift` + `e` : Emoji list to for copying and pasting

- `Alt` + `Shift` + `b` Toggle blur

bspwm Keybindings

Navigation

- `Left,Down,Up,Right` : Focus on a window in a given direction

- `Alt` + `[1-9]` : Focus on the desktop(workspace) number $[1 - 9]$

- `Alt` + `{` / `}` : Move to previous/next desktop(workspace)

- `Alt` + `Shift` + `[1-9]` : Move(shift) a focused window to the desktop(workspace) number $[1 - 9]$

Move and Resize

- `Win` + `Left,Down,Up,Right` : expand a window by moving one of its side outward

- `Win` + `Shift` + `Left,Down,Up,Right` : contract a window by moving one of its side inward

- `Win` + `Alt` + `Left,Down,Up,Right` : Move a floating window in the given direction

  Alternatively, use **left click** of the mouse to move and **right click** to resize the floating window

Transformations

- `Alt` + `t` : Tiling mode

- `Alt` + `Shift` + `t` : Pseudo-tiling mode (Same as tiling mode but the floating size is retained)

- `Alt` + `f` : Fullscreen

- `Alt` + `Shift` + `f` : Floating mode

Spotify

- `Alt` + `<` / `>` : Previous/Next track

- `Alt` + `?` : Show the song info in notification

- `Alt` + `~` : Toggle play/pause

Ranger

These are mostly abbreviations/aliases

- `cw` : rename
- `D` : delete
- Space : select
- `yy` : copy
- `pp` : paste
- `X` : extract
- `Z` : Zip
- Ctrl + h : Show hidden files/directories
- `bg` : set selected file as background
- `bw` : set selected file as background with pywal
- `chx` : `chmod +x` (make executable)
- `mkd` : `mkdir` (make directory)
- `tou` : `touch` (create a new file)

st Keyindings

- Win + c / v : copy/paste
- Win + j / k : scroll down/up
- Win + Shift + + / - : increase/decrease font size

Fish aliases

- `cf` : `cd ~/.confg`
- `cfb` : `cd ~/.config/bspwm`
- `cfs` : `cd ~/.config/sxhkd`
- `cfi` : `cd ~/.config/i3`
- `cfp` : `cd ~/.config/polybar`
- `ch` : `cd ~/`

- cs : cd ~/.scripts

- cff : cd ~/.config/fish

- la : ls -A

- .. : cd ..

- ... : cd ../..

- cfn : cd ~/.config/nvim

- cfnp : cd ~/.config/nvim/vim-plug

- cff : cd ~/.config/fish

- cfra : cd ~/.config/ranger

- cfd : cd ~/.config/dunst

- cfro : cd ~/.config/rofi

- chx : chmod +x

- ne : nvim

- cpi : nvim ~/.config/picom.conf
